

Genuine Pfeiffer Vacuum Service

HLT Rental Program

1. Rebuilt HLT 560/570 leak detectors from Pfeiffer Vacuum exchange stock, depending on availability, are rented at a 7-day weekly rate of \$650. Rentals for less than a week are at the weekly rate. The weekly rate includes holidays and weekends. The rental period begins when the unit is received at the Buyer's facility, and terminates on the date it is shipped back to Pfeiffer Vacuum. Rental orders are FOB Pfeiffer Vacuum in Nashua, NH or Milpitas, CA, depending on the stock location of the rental unit.
2. A purchase order is required for a minimum of two weeks, and may be extended in writing as needed. Pfeiffer Vacuum will invoice Buyer for a minimum of 2 weeks (\$1,300.00) and if extended, \$650.00 per week of actual rental beyond the 2 weeks.
3. When returned to Pfeiffer Vacuum, damage to the equipment other than normal wear and usage is Buyer's responsibility, and will be billed to Buyer at standard repair rates for parts and labor. Unless reported in writing to Pfeiffer Vacuum within 3 days of receipt of the rental unit at Buyer's facility, the following types of damage will be considered undisputed and the cost of repair will be Buyer's responsibility: Dents, cracks, gouges, broken metal or plastic, or scratches more than 1" (25 mm) long in or on the housing or control panel or any hand held controller or display, and broken or cracked frames together with above external damage, or torn or broken cables that connect the hand-held controller to the leak detector.
4. The unit is shipped in a special container and must be returned in the same container with the original packing material and a completed decontamination tag. If this packaging is missing or damaged, contact Pfeiffer Vacuum for instructions.
5. Buyer agrees to pay shipping costs both ways, and for insuring the shipments for their full quoted replacement value. Buyer is liable for any shipping damage. We recommend Buyer use a shipper and shipping method specified by Pfeiffer Vacuum. Generally, shipment is by truck within a 500-mile radius of Pfeiffer Vacuum, and by air beyond that. Buyer agrees to obtain a RMA number (return materials authorization) from Pfeiffer Vacuum prior to returning the unit to Pfeiffer Vacuum and permit Pfeiffer Vacuum to inspect unit at Buyer's facility prior to shipment, if Pfeiffer Vacuum deems necessary.
6. Except as defined above, Pfeiffer Vacuum's standard terms of sale TCPV016 (version 5/22/06) apply. By signing this form Buyer agrees to the above terms of sale.
