Headquartered in Asslar, Germany, Pfeiffer Vacuum is one of the world’s leading providers of vacuum solutions. In addition to a full range of hybrid and magnetically levitated turbo pumps, the product portfolio comprises backing pumps, measurement and analysis devices, components as well as vacuum chambers and systems. Founded in 1890, Pfeiffer Vacuum is active throughout the world today. The company employs a workforce of some 3,200 people and has more than 20 subsidiaries.

Pfeiffer Vacuum, Inc. – USA: We are looking for a

**Field Service Engineer**
**Nashua, NH**

**Your responsibilities will include:**

**SUMMARY**
Responsible for performing the on-site or in-house installation, servicing and repair of complex equipment and systems.

**ESSENTIAL DUTIES AND RESPONSIBILITIES**

To perform this job successfully, an individual must be able to perform each essential duty satisfactorily. The requirements listed below are representative of the knowledge, skill, and/or ability required. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions.

Exercise of judgment, discretion, and tact in all business matters and business relationships is required. Strong interpersonal skills and the ability to maintain clear and cooperative working relationships with co-workers and demonstrate regular attendance and punctuality are essential. The organization's leadership promotes collaborative problem solving in both formal and informal work teams. Participation in and contribution to teamwork within the organization is required. Additional requirements include experience in the high vacuum technology industry, and preferably the semiconductor market, as well as the ability to stay abreast of changes in those markets. Necessary interpersonal skills include being a self-starter, motivated, creative, flexible, self-confident, deadline oriented and able to multi-task.

**Supervisory Responsibilities**
None
**Duties**

1. Uses a wide range of hand and power tools, measuring devices, meters, and scopes to install, test, trouble shoot, and repair equipment.
2. Reviews customer requirements and discusses solutions with the account team.
3. Provides technical and service support to customers.
4. Works with account team to ensure maintenance contracts are fulfilled.
5. Responsible for onsite inventory levels and accurate equipment documentation.
6. Requires 60% of time at customer sites, 20% at Nashua Service Center, 20% of time/home Office
7. Perform other duties as assigned.

**Physical Demands**

The physical demands described here are representative of those that must be met by an employee to successfully perform the essential functions of this job. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions.

Tasks require walking, sitting, bending, reaching, mobility, and frequent lifting. Work requires computer skills (word processing, spreadsheet, and data-entry), attention to detail and accuracy. Communication skills including listening and speaking are required for interaction with other employees, vendors, and customers. Strong interpersonal skills, the ability to balance multiple tasks and any stress associated with the duties and responsibilities of this position are essential requirements in the performance of this job. Daily travel by car is required to support both the needs of the customers and internal personnel. Travel by air may be required to support customer base.

Additionally, must be able to manipulate small and large tools to make both fine and major adjustments to intricate test apparatus and equipment. The person in this job must be able to lift tools and equipment weighing up to sixty pounds. The position requires regular lifting of 25 pound equipment plus frequent pushing of heavy equipment that is mounted on wheels. The position requires the ability to stand most of the day and to be able to maneuver equipment into the correct spot at the customer's facility.

Secondary duties with added requirements may be assigned from time to time.

**POSITION REQUIREMENTS**

**General Qualifications:**
Strong organizational and creative problem solving skills as well as good planning and technical equipment troubleshooting skills required. Ability to work under tight deadlines in a dynamic group environment is necessary. Experience in high vacuum technology is essential as is knowledge of the field service type requirements that this position will support.

**Education and/or Experience**
Typically requires an Associate's degree, preferably in an Electronics discipline or at least five years of related experience. In-depth knowledge of company related products, vacuum technology, semiconductor is a definite plus. High level of mechanical and electrical troubleshooting skills necessary.

**Language Skills**
The ability to communicate in English verbally and in writing is essential. Reports email correspondence, schedules; performance reviews are all typical requirements of this position and must be effectively and professionally communicated. This position also serves as a key liaison between the customer and the Company and must articulate critical needs, issues, situations, and plans to keep customer satisfaction high.
Mathematical Skills
Vacuum measurements; equipment calibration; scheduling of personnel and product installations and maintenance are all requirements of this position.

Reasoning Ability
The ability to understand the customers’ requirements and plan the support strategy is essential. Must be able to solve both practical and complex problems and deal with a variety of factors in situations where only limited standardization exists.

Certificates, Licenses, Registrations
This position requires frequent travel to and from the customer site and a Service Center so a valid driver’s license and satisfactory driving record are required at the time of hire and periodically thereafter.

TOOLS AND/OR EQUIPMENT
This position uses a computer extensively with demonstrated abilities in the use of Microsoft products as well as other common office type equipment. The Field Service Engineer is also a leading authority on the proper assembly and maintenance of the Company’s equipment.

WORK ENVIRONMENT
This position will work at the customer’s site to support the Company’s employees and the customer’s representatives.
