ACP 15 / 28 / 40

Dry compact Multi-stage Roots pumps.
Clean vacuum. High reliability.
The multi-stage Roots pump technology of the ACP series meets the requirements of applications where clean and dry vacuum is needed.

**No particle contamination**

The frictionless pumping module is optimized to operate without internal lubricant and provides outstanding oil-free vacuum with no hydrocarbon vapor backstreaming. Without any seals between rotor and stator no particles are generated.

**High reliability**

The absence of wearing parts inside the pumping module allows for unsurpassed long-term stability and high reliability in even the most demanding applications.

**Constant performances**

The frequency converter driven motor provides constant rotational speed, thus stable pumping speed and consistent ultimate pressure are achieved all over the world.

**Low maintenance costs**

Our ACP pumps require overhaul only every 22,000 hours of operation for the ACP 28/40 and 20,000 hours of operation for the ACP 15 resulting in low cost of ownership.

**Condensible vapor ability**

High flow gas ballast ports and drainable silencers allow the ACP to pump high amounts of condensible vapors (up to 1,000 g/h of pure water vapor).
Best solution – Ideal replacement for scroll and oil-sealed pumps
Air cooling – No installation and operational costs for water supply
Frequency converter – Hour meter, remote operation mode (RS-485, dry contacts, multiple rotational speed selection (power saving, noise reduction, adaptation to application cycle)
Several gas port options – Purge gas, gas ballast, other specific ports according to application
Universal power supply – Wide voltage supply 50/60 Hz single-phase and three-phase
Standards – Compliance with CE standards, UL/CSA certified, SEMI S2 certified
Dry compact Multi-stage Roots pumps.
Clean vacuum. High reliability.

Typical applications of ACP pumps

Analytical instruments
- Electron microscopes
- Surface analyzers
- Leak detectors
- Mass spectrometers
- Optical spectrometers

R & D
- Particle accelerators
- Turbo pumping stations
- Laboratories

Industry
- Lamp manufacturing
- Vacuum coating
- Cryo pumps regeneration
- Plasma cleaning
- Drying
- Load-lock

Specific applications need special solutions

Special versions have been developed for:
- Helium recirculation in a closed-loop
- Backing turbopumps in UHV systems

Please contact us for special versions.
Several versions for a wide range of applications

**Standard version**  
(ACP 15 / ACP 28 / ACP 40)  
The SD version is designed for applications that require pumping of clean (dust-free) and non-corrosive gases. Standard pumps are equipped with a gas ballast device to improve pumping of light gases and avoid vapor condensation inside the pump. Three gas ballast options are available to satisfy customer needs.

1. Permanently open inlet filter  
2. Manual gas ballast knob (open/close)  
3. Blanked-off (closed by plug)

**Version for corrosive gases**  
(ACP 15G / ACP 28G / ACP 40G)  
The G version pump is compatible with traces of corrosive gases. Three purge gas jets protect low and high pressure bearings and dilute trace amounts of corrosive gases.

**Purge port R 1/4”**

**Version for condensable vapors**  
(ACP 28CV / ACP 40CV)  
The CV version is specially designed to avoid vapor condensation inside the pumping module with:
- A high gas ballast flow to warm up the pump and dilute condensable gases  
- An external drainable silencer to remove liquid from the lowest point of the exhaust stage.  
- A gas purge to protect lip seals and ball bearings from condensable vapors.  
CV versions extend the pure water vapor capacity up to 1,000 g/h.

**Drainable silencer**
**ACP 15 / 28 / 40**

Dry compact Multi-stage Roots pumps.

4) B is the only option for G version
5) V or H are the only options for CV versions
Dry compact Multi-stage Roots pumps. Clean vacuum. High reliability.

**Accessories**

**Inlet particle filter**

Inlet particle filters will prevent solid particles from entering the ACP pumps.

For ACP 15 and ACP 28, the suitable filter is IPF 25:
- Inlet/exhaust ports: DN 25 ISO-KF

For ACP 40, the suitable filter is IPF 40:
- Inlet/exhaust ports: DN 40 ISO-KF

Filtration threshold: 25 µm

<table>

</tr>
</tbody>
</table>

**External silencer**

Use of the external exhaust silencer ES 25S will significantly reduce the noise level when operating ACP pumps at high pressures:
- Inlet/exhaust ports: DN 25 ISO-KF

ES 25S can be used at the exhaust of ACP 15, ACP 28 and ACP 40.

Delivered with all necessary fittings for connection at the exhaust port for all ACP pumps.

Dimensions in mm
Noise reduction covers

NRC 15 and NRC 28/40 reduce ACP noise levels significantly.

Noise level reduction from 5 to 6 dBA:
- NRC 15 for ACP 15
- NRC 28/40 for ACP 28 and ACP 40
- Max. ambient temperature: 35 °C

An additional pipe extension is required for each port to connect accessories when NRC is mounted.1)

1) Pipe extension, centering rings and clamping rings have to be ordered separately.

</tbody>
</table>

Sound enclosure kit

Sound enclosure kits are the appropriate solution for operating ACP pumps in even the most quiet environments.

Noise reduction of 10 dBA.

- Max. ambient temperature: 30 °C
- SEK 15 includes dedicated DN 25 exhaust silencer

VACUUM SOLUTIONS FROM A SINGLE SOURCE
Pfeiffer Vacuum stands for innovative and custom vacuum solutions worldwide, technological perfection, competent advice and reliable service.

COMPLETE RANGE OF PRODUCTS
From a single component to complex systems:
We are the only supplier of vacuum technology that provides a complete product portfolio.

COMPETENCE IN THEORY AND PRACTICE
Benefit from our know-how and our portfolio of training opportunities!
We support you with your plant layout and provide first-class on-site service worldwide.

Are you looking for a perfect vacuum solution?
