

Vacuum Equipment for Analytical Applications

Vacuum Calculation for Your Customized Solutions!

In addition to standard pumps, we offer customized solutions and we also do the vacuum design and calculation for you.

HiPace turbopumps

- Patented laser balancing technology
- High performance lubricant

SplitFlow turbopumps

- Customized pumps
- Perfectly suited for mass spectrometry & electron microscopy

HiScroll scroll pump

- Oil-free vacuum pump
- High comfort, low noise level, low vibration
- Sustainable and energy efficient

Rotary vane pumps

- No leakage due to patented design
- Long maintenance intervals

Measurement equipment

- Covers the entire vacuum range
- Suitable for all requirement profiles

Valves

- We offer isolation valves & pressure control valves
- Valves for all applications

Vacuum components

- Sealing & fastening elements
- Standard flange & pipe components
- Elastic connections & viewports in all flange series
